Work Experience

Research Assistant
September 2016 - Current | Software Evolution Lab
▪ In charge of researching, planning, and developing an Eclipse plugin for semi-automated API documentation
▪ Involves usage of object-orientated Java, Eclipse PDE environment, and knowledge of markup languages and content generators

Music Librarian
May 2015 - August 2016 | CKUT Radio
▪ Managed incoming music to the station, trained and integrated new volunteers, handled the online database for the stations music, and assisted with audio tech set up

Projects

End Harrassment Chrome Extension
September 2016, December 2016-current | Uplift
▪ Helped create backend code for the extension to hide tweets deemed as harrassment. Working on both tweaking front end apperance as well as building backend features using React and Redux.

OPAL Hybrid App
September 2016 - January 2017 | Health Informatics Group
▪ Building experimental features on a prototype mobile app built on the Cordova framework in combination with Angular. The app is aimed to improve the experience of oncology patients.

Web Applications
Summer 2016 | Online Courses
▪ Built various simple web apps using MEAN stack, including authentication with Passport and basic styling with Bootstrap and jQuery.

Extra Curriculars

Venus Collective
June 2016-current
▪ Currently a member of Venus at CKUT, a queer feminist collective, and occasionally host shows and DJ events to raise money.

Queer McGill
December 2013-May 2014
▪ Volunteered as office staff. Tended to administrative matters and offered assistance to students in need
